

Azure security, connected.

From business risk to inspectable architecture, detections, response, and evidence.

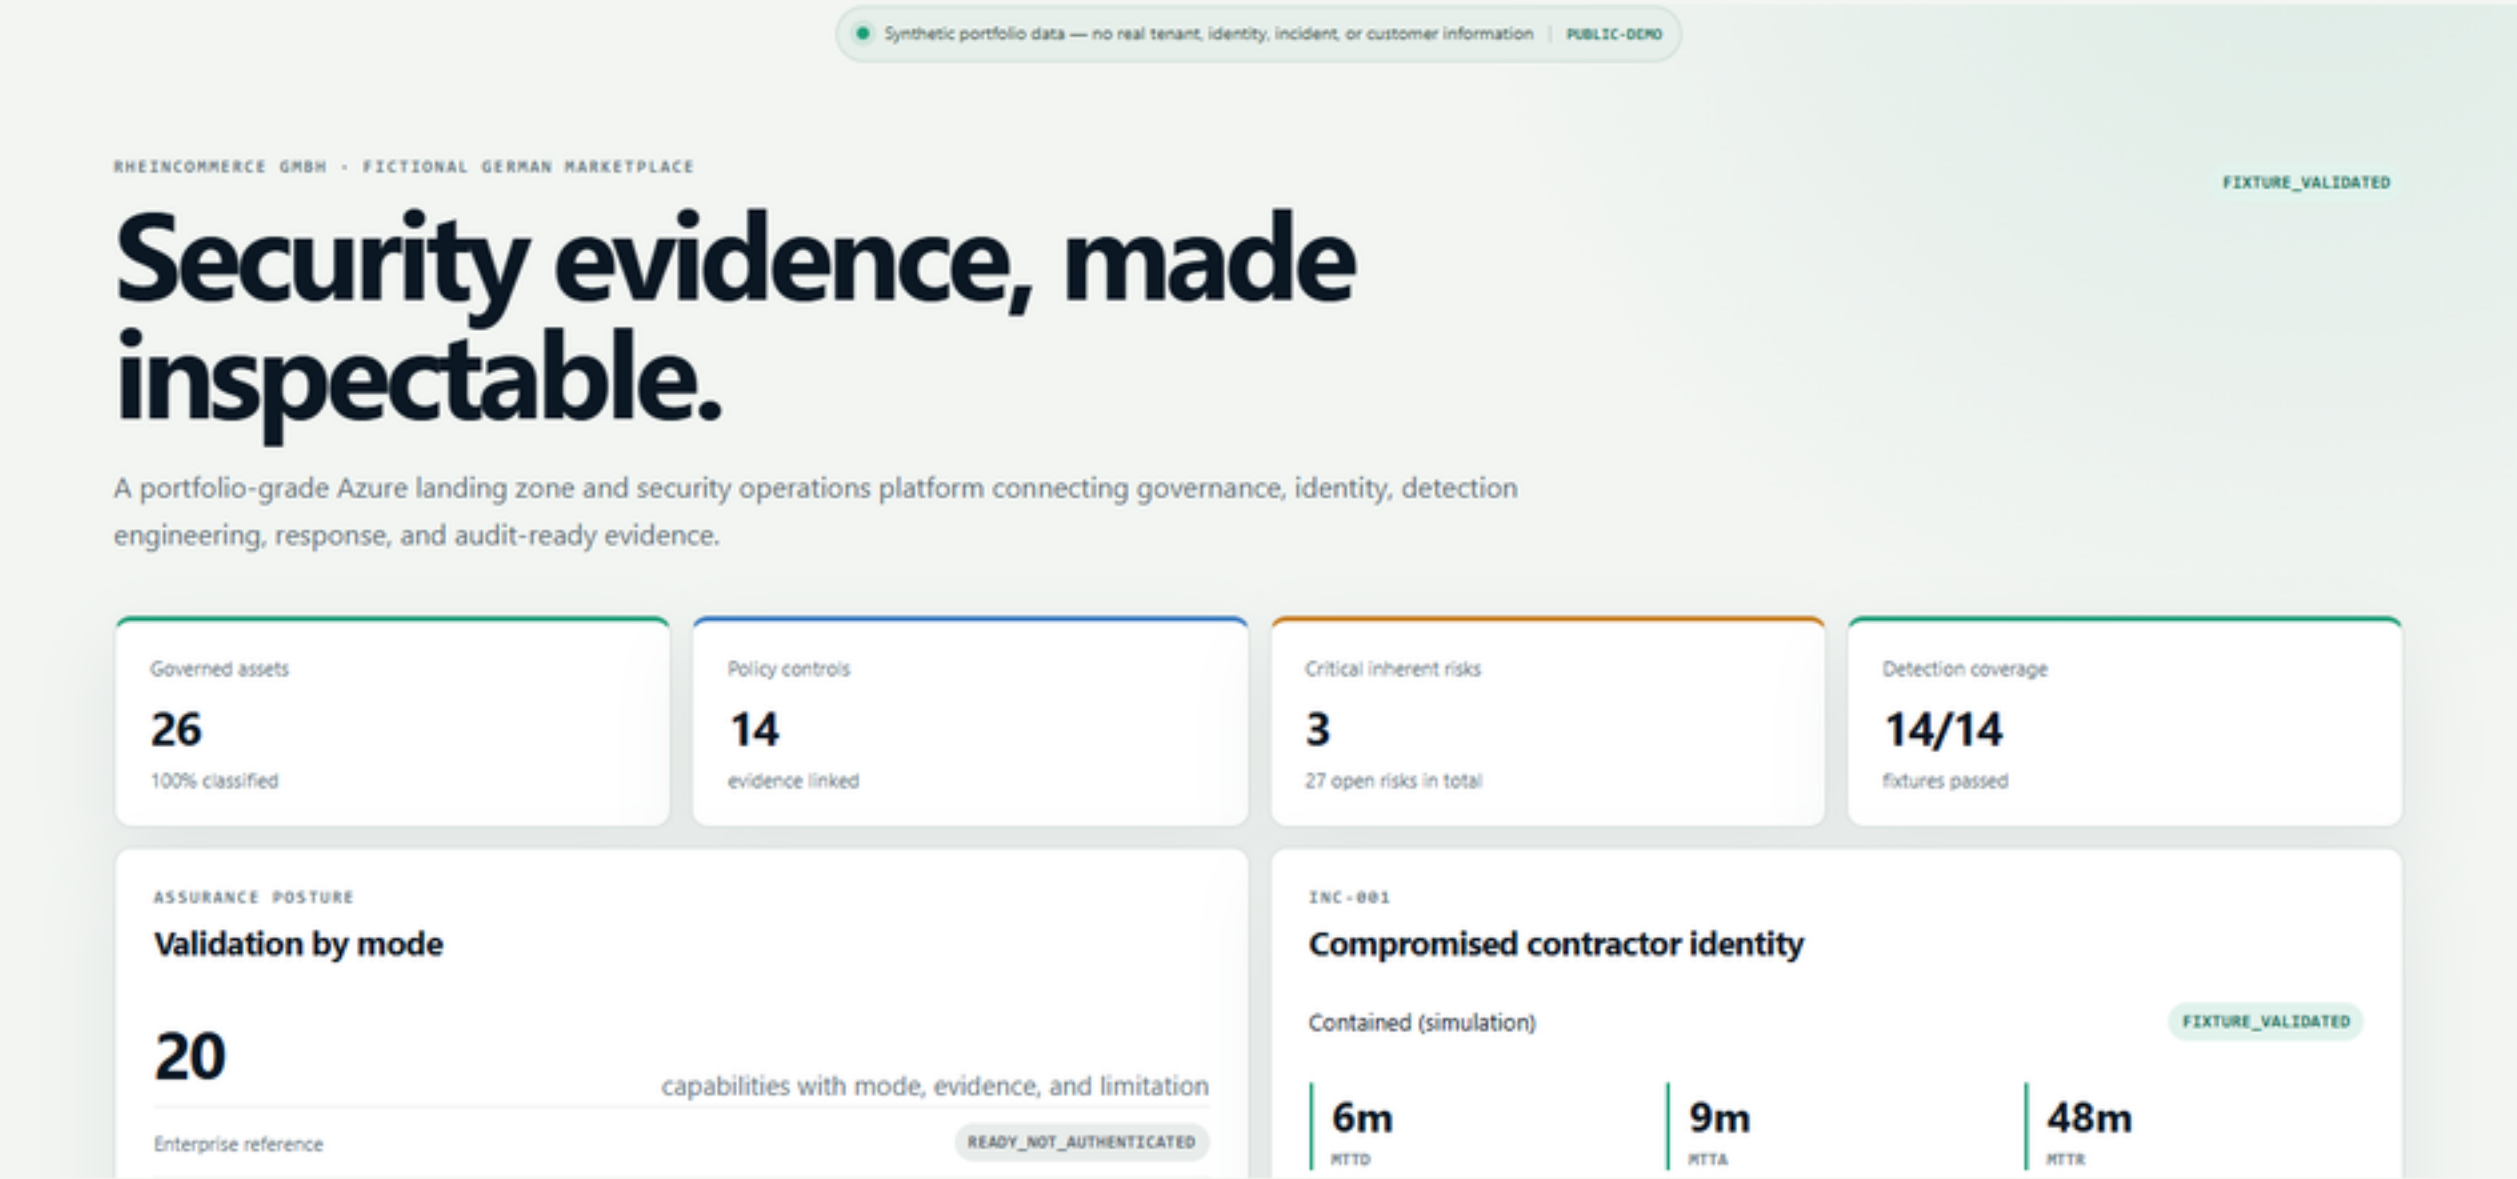

RheinShield

LANDING ZONE

ZERO TRUST

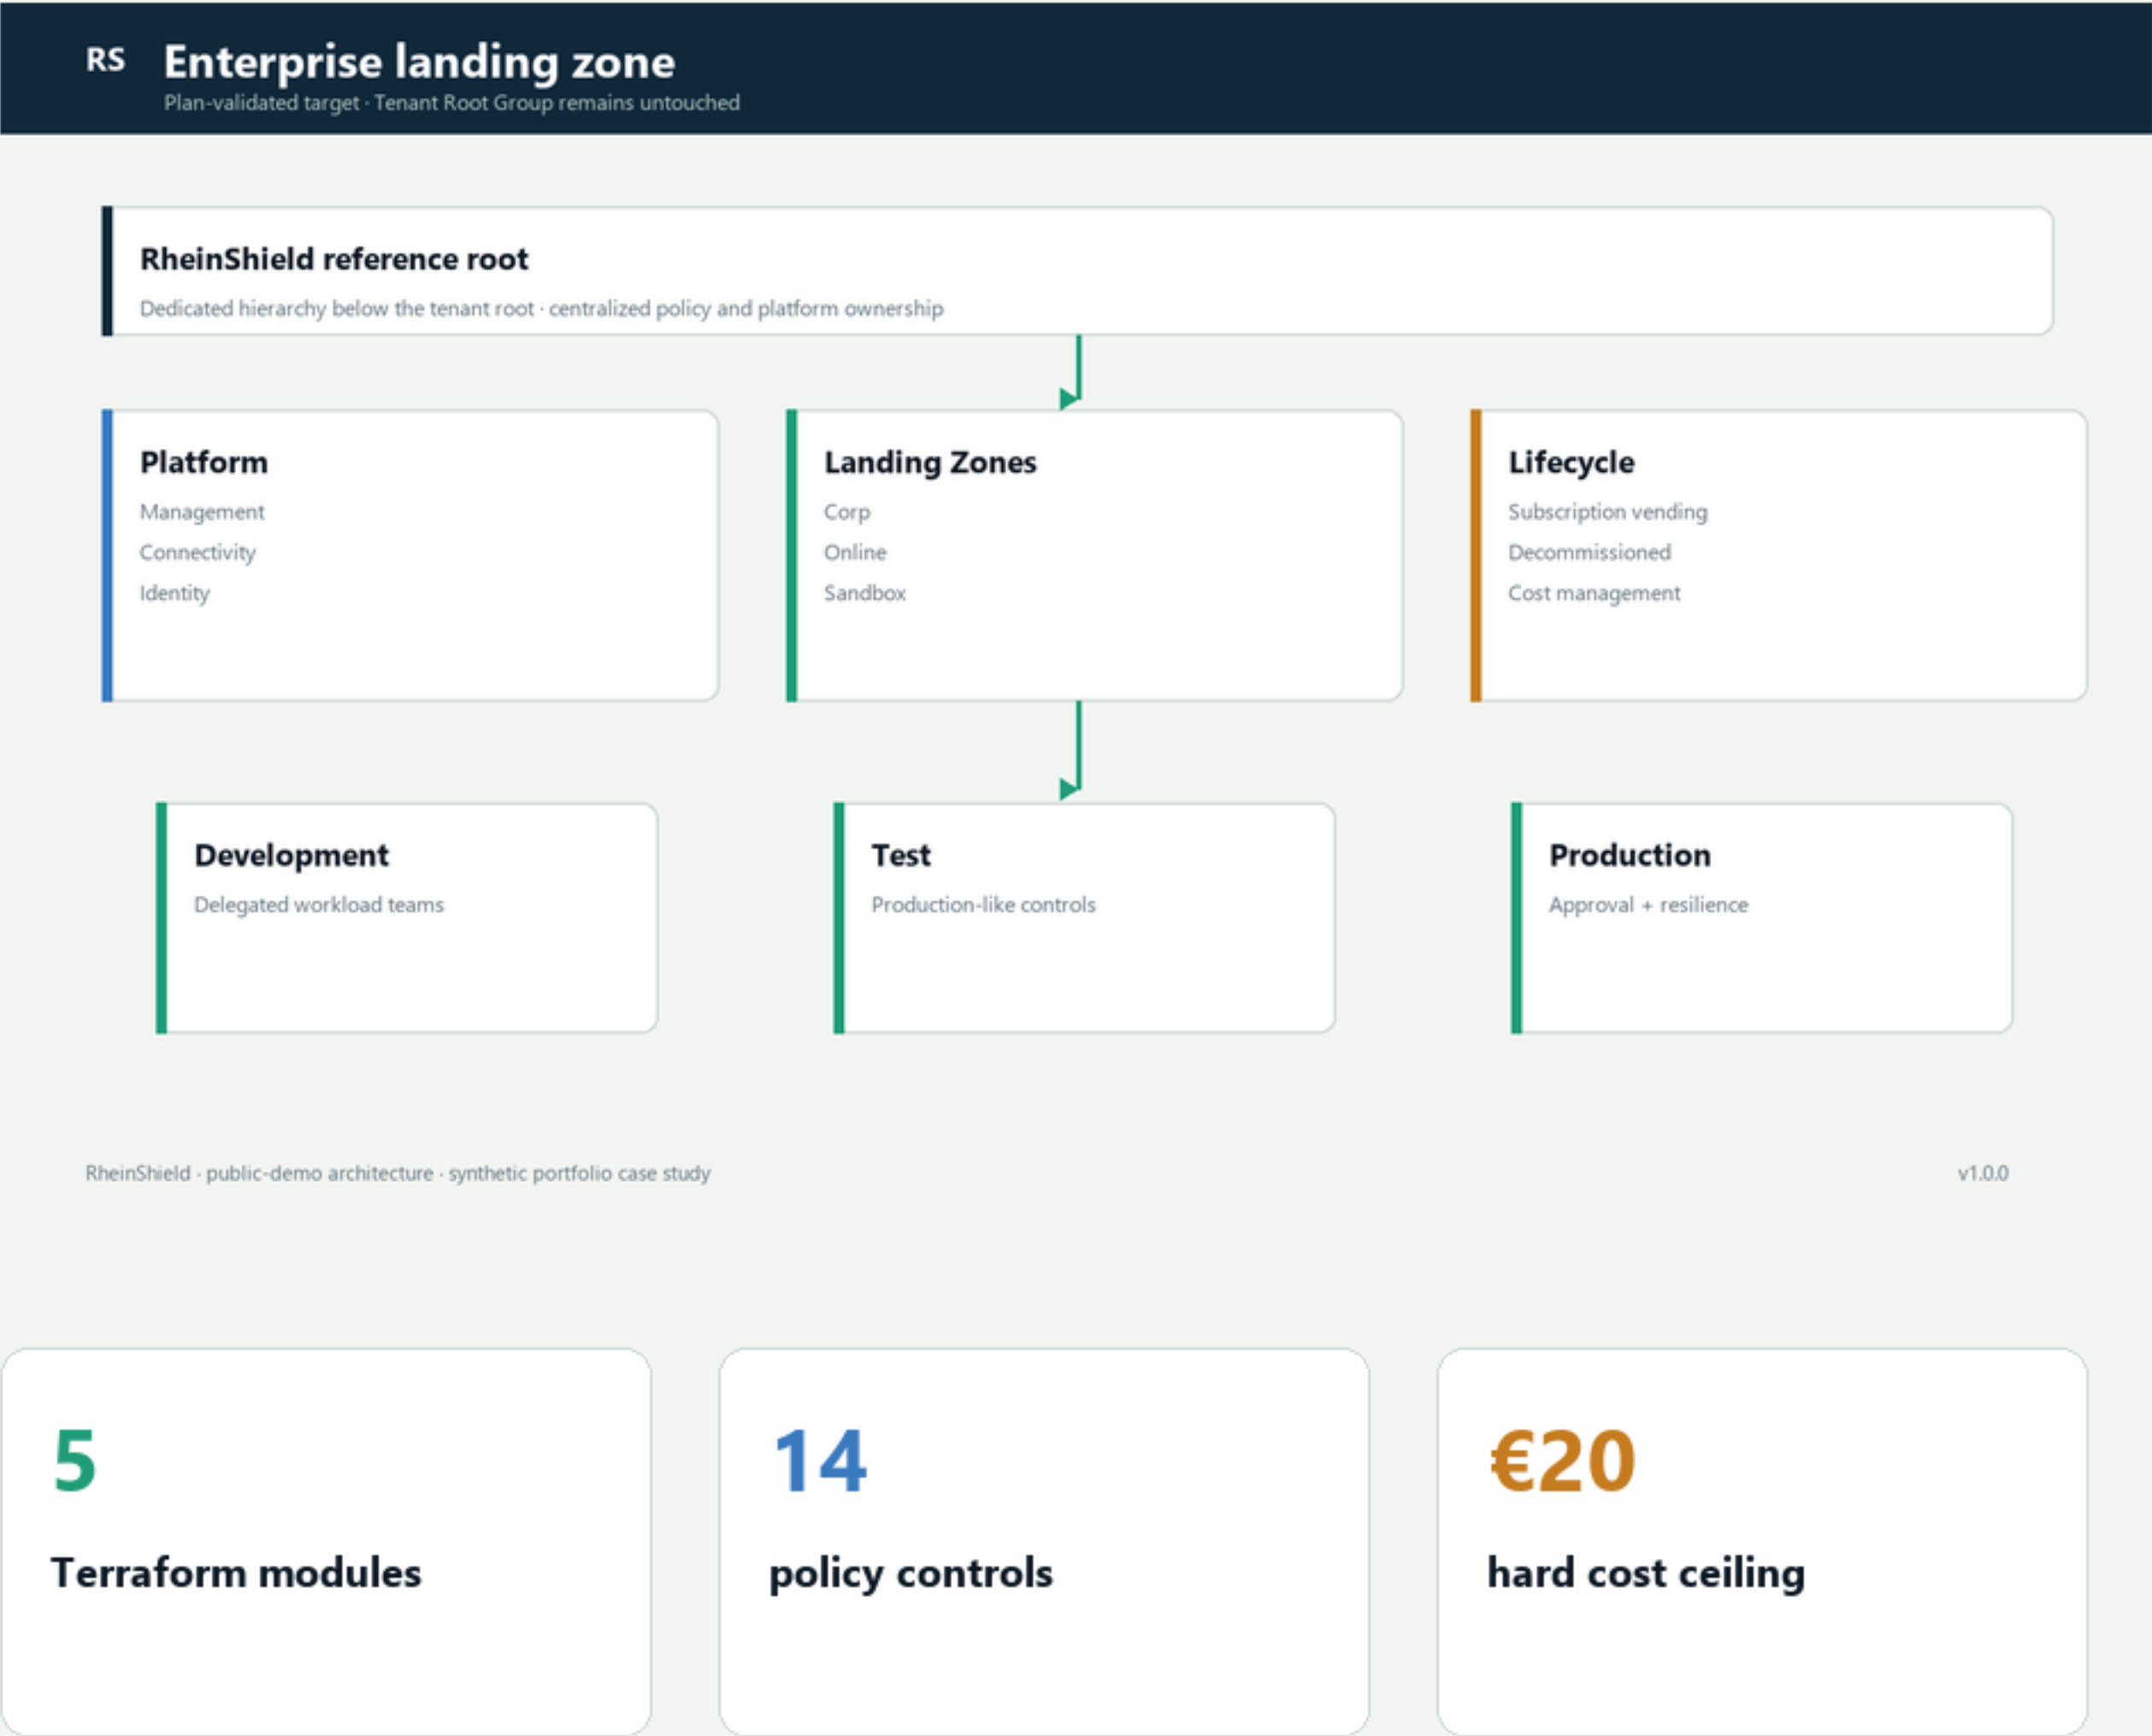

SENTINEL + KQL

NIS2 • ISO • BSI • MCSB

Two architectures. One boundary.

A production-oriented reference stays separate from a disposable portfolio lab.

PLAN_VALIDATED · LIVE APPLY COST-GATED

Sentinel detection as code

Deterministic fixtures make logic reviewable while keeping production claims honest.

SOAR & detection coverage

Detections as code with malicious and benign fixtures, explicit data dependencies, and safe dry-run playbooks.

Analytics rules

14

14/14 fixtures passed

Hunting queries

5

attack-chain oriented; not live executed

Workbooks

3

validated JSON templates

SOAR

3 + 3

automation + playbooks

Detection catalog

Fourteen disabled rules with synthetic test cases

ID	USE CASE	MITRE TACTIC	SOURCE
RS001	Password spray	Credential Access	Microsoft Entra ID
RS002	Success after failures	Initial Access	Microsoft Entra ID
RS003	Impossible travel	Initial Access	Microsoft Entra ID
RS004	Privileged role assignment	Privilege Escalation	Audit Logs
RS005	Service principal credential	Persistence	Audit Logs
RS006	Conditional Access change	Defense Evasion	Audit Logs
RS007	Unrestricted inbound rule	Initial Access	Azure Activity
RS008	Monitoring control deleted	Defense Evasion	Azure Activity
RS009	Storage public access	Exfiltration	Azure Activity
RS010	Key Vault access spike	Credential Access	Diagnostics
RS011	Encoded PowerShell	Execution	Security Events
RS012	Mass object download	Collection	Diagnostics
RS013	Unfamiliar deployment principal	Persistence	Azure Activity

Fixture test matrix

28/28

EXPECTATIONS MET

True positives	14
True negatives	14
False positives	0
False negatives	0

Fixture metrics do not represent production efficacy; the Python evaluator is not a service-side KQL execution.

14/14

malicious trigger

14/14

benign stay quiet

3 + 3

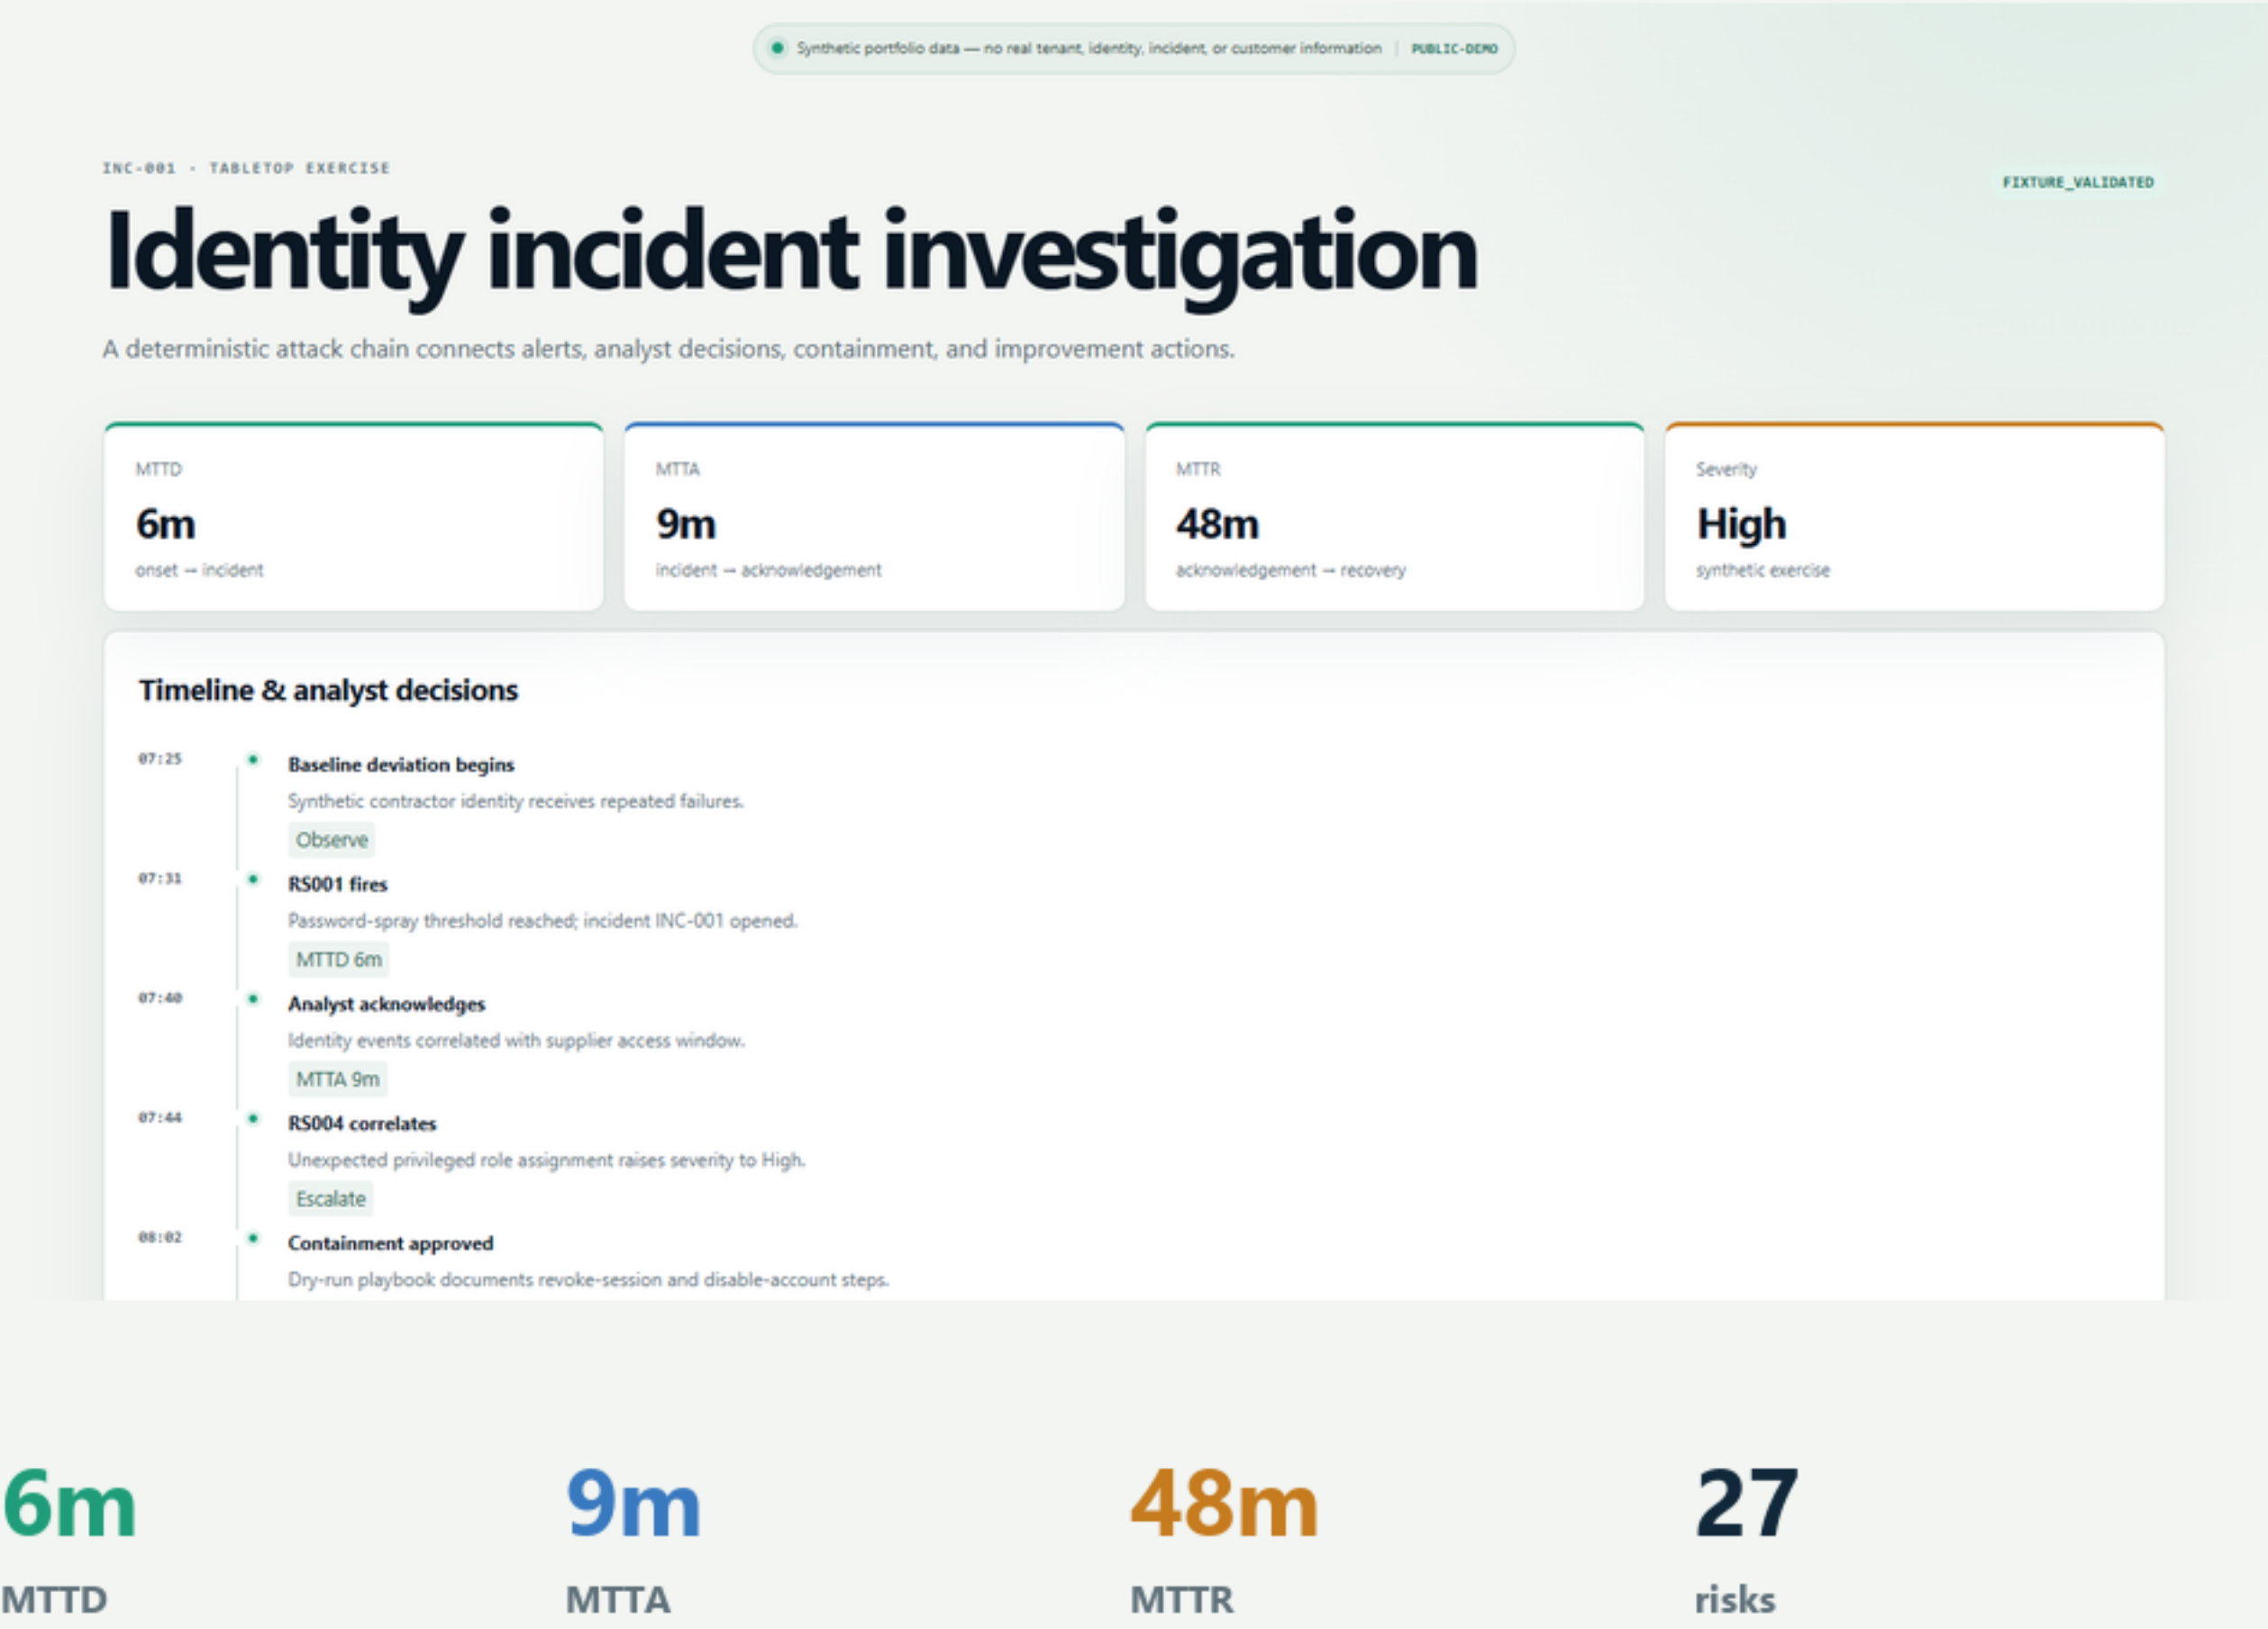

automation + playbooks

5 hunts · 3 workbooks · MITRE mappings · safe dry-run SOAR

Fixture behavior ≠ production efficacy

Incident decisions become evidence

INC-001 links detections, analyst actions, containment, recovery, risks, and controls.

6m

MTTD

9m

MTTA

48m

MTTR

27

risks

20 evidence controls • NIS2/BSIG • ISO 27001 • BSI • MCSB

Exercise metrics only • no compliance or certification claim

Reproduce the evidence

The default public mode runs without Azure credentials and exposes no private tenant data.

- ✓ **Terraform** format · validate · native test
- ✓ **Sentinel** 28/28 fixture expectations
- ✓ **Dashboard** 8 routes · EN/DE · mobile
- ✓ **Accessibility** 0 axe A/AA violations · 3 representative scans
- ✓ **Privacy** pattern + screenshot review PASS
